

# E-TWINNING

Il nostro progetto “E-TWINNING” ha previsto il contatto con due insegnanti residenti in Gran Bretagna ed ha permesso un interscambio socioculturale sulle realtà dei propri paesi (ITALIA – GRAN BRETAGNA).

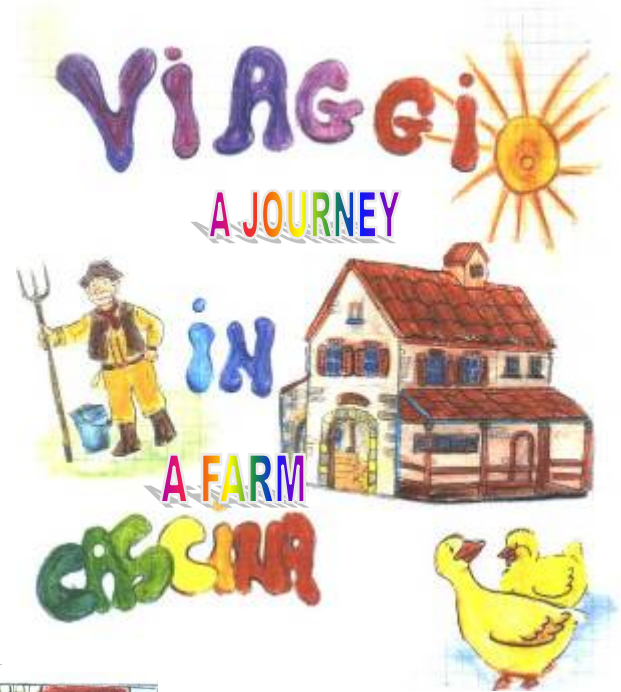

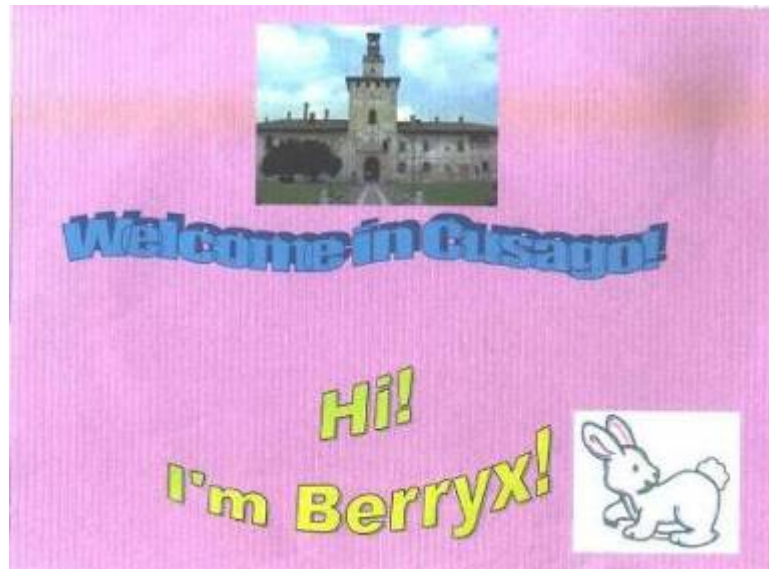

Tutti gli elaborati, prodotti nell’ambito di “AGENDA 21”, hanno permesso alle rispettive classi di trasmettere, in lingua inglese, una serie di informazioni riguardanti l’ambiente e tutte le attività legate ad esso. Mascotte del progetto è il coniglietto Berryx.

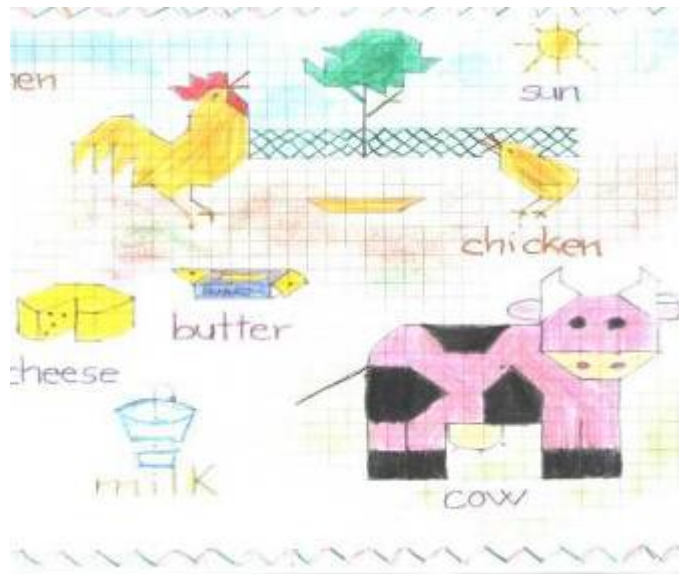

Tutti i prodotti realizzati, nell’ambito del progetto, sono stati inseriti in una presentazione digitale per PC e raccolti su cartelloni murali. Il tutto è stato presentato, durante la festa di fine anno scolastico, alla cittadinanza, riscuotendo l’interesse e la curiosità dei presenti.

Il progetto è ancora “in itinere” poiché tutte le comunicazioni tra i due Paesi hanno riscosso interesse in ogni realtà: italiana e inglese.

# THE WOOD OF CUSAGO

by 3<sup>rd</sup> A

Last November we visited the wood of our town.

We enjoyed it very much, because it was the first time for us: we were very excited!

We saw so many trees, plants and mushrooms. We heard the song of the birds.

The wood of Cusago is very beautiful...

It was a fantastic experience!

THE WATER, A PRECIOUS RESOURCE  
 WATER IS A PRECIOUS GOOD.  
 WITHOUT IT THERE WOULD NOT BE  
 THE LIFE.  
 IT IS IMPORTANT

### THE WOOD OF CUSAGO

THE WOOD IS STILL COMPOSED BY A PART OF THE TYPICAL FOREST ONCE COMMON IN THE "PIANURA PADANA" WHICH REMAINED UNTOUCHED.  
 IT IS LOCATED ABOUT 15 KM FAR FROM MILAN, LOOKING STRAIGHT TO THE CATHEDRAL CALLED "DUOMO"

Campari Bianca

### Sezione del fontanile

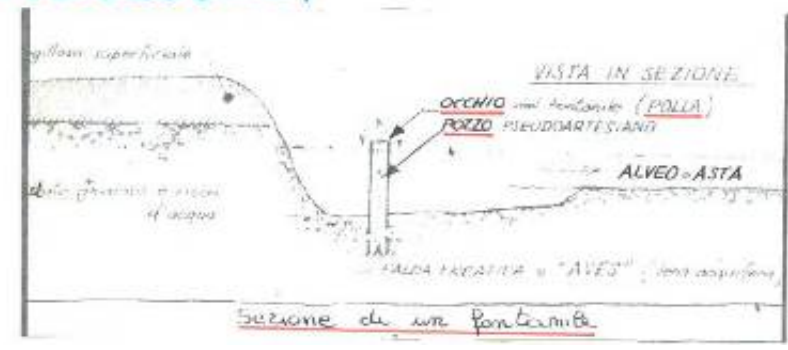

TESTA:  
 From place where  
 the rain comes out  
 from the ground.  
 (Federica)

ASTA: stream channel  
 where the water flows.  
 (Bianca)

FALDA: impermeable  
 stratum place where water flows  
 under ground.  
 (Beatrice)

(Anna Pesarenti)

Sezione di un fontanile

During the walk we heard some birds singing: the nightingale and some species of pigeons and doves. We also saw some animals: foxes and rabbits. It was a very interesting trip, because we discovered and learnt many aspects of the nature in our neighbourhood!

# LA RISAIA

**At the end of October the fields of rise are yellow**

**In March the ground is brown.**

**At the start of June the water in the field looks like a sea; it's the sea of our plain!**

**May, rise comes through; the field is green.**

**In August the yellow ears of rise are ripe!**
